Index Value	Air Quality Descriptor	Protect Your Health
0-50	Good	No health effects are expected when air quality is in this range.
51-100	Moderate	Extremely sensitive people should consider reducing prolonged or heavy exertion.
101-150	Unhealthy for Sensitive Groups	People with heart or lung disease, older adults, and children should reduce prolonged or heavy exertion.
151-200	Unhealthy	People with heart or lung disease, older adults, and children should avoid prolonged or heavy exertion. Everyone else should reduce prolonged or heavy exertion.

0-50
Good

51-100
Moderate

101-150
Unhealthy for Sensitive Groups

151-200
Unhealthy

Know the air you breathe.

GREEN means it is safe to proceed with your normal routine.

YELLOW means extremely sensitive people should limit prolonged outdoor exertion.

ORANGE means sensitive individuals should limit their outdoor activities. This group includes those with lung or heart ailments, elderly, children, and people who work or spend a lot of time outdoors.

RED means the air quality is unhealthy: everyone should slow down and take it easy.

Use the Air Quality Index

Every day the Environmental Protection Agency (EPA) uses a color-coded scale known as the Air Quality Index (AQI) to report the amount of pollutants present in the air and the level of health concern.
